Date of Birth: 23 de August de 2000

HIGHER EDUCATION

Universidad de las Fuerzas Armadas ESPE   2019 – 2024
Software Engineer   Quito, Ecuador

EXPERIENCE

TICKETSTAR365 - Quito - Ecuador   05/2023– 07/2023
Software Developer
Development and maintenance of a web platform for event management and ticket sales, covering both the frontend and backend. This includes implementing new features and maintaining existing ones, as well as optimizing responsive aspects using HTML, CSS, Bootstrap, PHP, and JavaScript.

FAME S.A. – Sangolquí – Ecuador   10/2022– 12/2022
Software Developer (Internship)
Project lead in the development of a shoe management application using Android Studio, where processes that were previously manual were automated through the application. Firebase Realtime Database was implemented for efficient real-time data management, and user security was enhanced through the integration of Firebase authentication.

ACADEMIC/PERSONAL PROJECTS

Model of a Fuzzy Logic-Based Recommender System to Evaluate Significant Works at the Universidad de las Fuerzas Armadas ESPE
Thesis
A web platform was developed using an agile Scrum methodology to optimize the administrative management of the Commission for Significant Works. This solution, built with modern technologies such as React, NodeJS, Express, MySQL, Multer, and Axios, allows faculty members to submit requests online, attach documentation, and monitor the progress of their procedures in real time. The development covered the stages of analysis, design, development, testing, and implementation.

Programming Languages
- Java
- JavaScript
- PHP

Frameworks/Libraries
- React
- NodeJS
- Bootstrap
- Material-UI
- Express

HyperText Markup Language
- HTML
- CSS

Databases:
- MySQL
- PostgreSQL
- MongoDB
- Firebase Realtime Database

Methodologies
- Scrum

COMMUNITY SERVICE

Software Development   06/2023 – 09/2023
Schlumberger/Universidad de las Fuerzas Armadas ESPE. Quito - Ecuador Development and maintenance of a web platform for inventory management and sales of textile supplies, using React and NodeJS for the frontend and backend, and managing MongoDB databases in a social project at the Universidad de las Fuerzas Armadas ESPE.
